

# GENERAL MAINTENANCE

---

## Daily

1. Check State of Charge (ensure battery is sufficiently charged)
2. Check headlights, turn signals, brake lights, and brakes.

## Monthly

1. Check the tire pressures. Tires are factory filled with nitrogen.
2. Inspect all power cables for any signs of damage.
3. Check coolant levels.

QUICK START GUIDE

## OPERATION

1. Inspect before each use (360° visual).
2. Enter vehicle; close doors (if equipped). Buckle up!
3. With park brake engaged (up position), insert the key and turn to «N» (NEUTRAL/ON).
4. Allow the Driver Display to illuminate.
5. Release the park brake, turn the key to «F» (FORWARD) or «R» (REVERSE), and proceed.
6. To park, stop with the brake pedal fully depressed, pull up the park brake, turn the key to «OFF», and remove the key.

## BATTERY MAINTENANCE

- Charging and maintenance directly affect your battery life. **Plug it in!**
- When you are finished for the day, **plug it in. NEVER** let the battery drop down to zero charge. Ideally, keep it above 50%. **Plug it in!**
- When it is cold outside, **plug it in.** Charging warms the battery.
- Store your Vanish inside (garage, vehicle shop, etc.) when at or below freezing or in very hot weather.
- Moderate acceleration and braking prolong battery range and life.
